Stresscon Finishes Total Precast Cabela's Office Building

Denver, Colo. (January 30, 2015) - Stresscon has completed erection of the total precast Cabela's Corporate Office building located in Sidney, Nebraska. The Cabela's project features four stories of precast prestressed concrete, and highlights the use of architectural precast products featuring a buff acid etch surface and bull noses, pilasters and sills. The horizontal precast walls are 16 feet tall by 32 feet wide, and were custom designed to accommodate shipping from Colorado to the Nebraska build site.

A collaborative design-build team including S.A. Miro, Inc., Davis Partnership Architects, GE Johnson Construction Company, and Stresscon Corporation participated in creation of the 168,000 square foot facility. The precast components were erected over 33 days, bringing the entire project ahead of schedule by three weeks.

Stresscon provided 762 precast pieces, including architectural solid wall panels, columns, inverted tee beams, double tees, and other various architectural pieces. The pieces were spread through 465 loads and shipped 238 miles from Stresscon's Colorado Springs plant. Production of all precast pieces occurred over a 72 day period. Stresscon was also responsible for erecting steel stairs for the stair shafts, including the grand stairway.

Cabela's has been serving the hunting, fishing, and outdoor sectors since 1961. Cabela's retail locations currently serve all 50 states with 57 US locations, and Canada with seven locations. The retail locations are known for their unique showrooms, wildlife forums, and education centers. The Cabela's catalog also provides affordable and high quality outdoor equipment and reaches over 125 countries.

With the precast erection phase complete, the interior of the project is now being finished. The Grand Opening is scheduled for June 2015.

About Stresscon Corporation

Stresscon Corporation designs, fabricates, and erects quality structural and architectural precast concrete structures for the construction communities of Colorado and the Rocky Mountain region. Founded in 1967, and a member of the EnCon Companies since 1993, Stresscon is PCI certified and specializes in institutional and commercial applications. To learn more, visit www.Stresscon.com.

About The EnCon Companies

The EnCon Companies are specialty contractors providing precast/prestressed concrete systems and services to all facets of the construction marketplace. In addition to the corporate offices and the design group, EnCon Companies maintains nine manufacturing facilities nationwide. Recognized as one of the leading precast companies in the United States, EnCon is pioneering the use of the latest technology for the design and fabrication of precast structures.
